Disposal of Materials that May Contain Asbestos DISPOSAL GUIDELINES

To protect workers at CSR D Refuse Disposal Facilities from exposure to Asbestos-Containing Materials, the CSR D has created guidelines and procedures for accepting construction, renovation and demolition waste with materials that may contain asbestos. If material is known to contain asbestos, the CSR D Asbestos Disposal procedures must be followed.

Materials that May Contain Asbestos - Renovation or demolition materials including gypsum wall board (drywall), ceiling texture, wall tape and mud compound, floor tile and attic insulation.

Waste Categories:

	YEAR	WASTE MATERIAL	ACCEPTED AT
1	POST - 1990	Construction/Renovation/Demolition Waste	CSR D Transfer Station or Landfill
2	PRE - 1990	Renovation/Demolition Waste (Contained)	CSR D Transfer Station or Landfill
3	PRE - 1990	Renovation/Demolition Waste (Uncontained)	CSR D Landfill

Category 1

POST-1990 Construction/Renovation/Demolition Waste - Asbestos Free Waste

DEFINITION

POST-1990 Construction/Renovation/Demolition Materials (after 1990)

These materials consist of previously used Renovation/Demolition Materials where the origin, age and content of the material is declared to have been installed after December 31, 1989. This may include material from new construction projects.

DISPOSAL INSTRUCTIONS

- Materials must be easily accessible for inspection by site attendant prior to off-loading
- Materials must be deposited into the appropriate location for disposal.
- Materials must be accompanied by a signed *Asbestos Declaration and Acknowledgement Form*

NOTES

New construction materials consists of unfinished cuts of gypsum (also called "cut offs") and other materials resulting from new construction. New construction materials may be directed to recycling stockpiles where programs exist.

The *Asbestos Declaration and Acknowledgement Form* is available on the CSR D website www.csr.d.bc.ca and at all CSR D Landfills and Transfer Stations.

For further information please contact the Columbia Shuswap Regional District at 250.833.5950 or toll free at 1.888.248.2773 or visit the CSR D website at www.csr.d.bc.ca

Category 2

PRE-1990 Renovation/Demolition Waste - Bagged/Contained Waste

DEFINITION

PRE-1990 (before 1990) Renovation/Demolition Waste consists of **Materials that may Contain Asbestos** installed before December 31, 1989 **OR** where the origin, age and content of the renovation/demolition materials are unknown.

PRE-1990 Renovation/Demolition Waste materials are deemed to be **Waste Material That May Contain Asbestos** and must be handled and disposed accordingly.

DISPOSAL INSTRUCTIONS

- PRE-1990 Renovation/Demolition Waste is accepted for disposal at all CSRD Transfer Stations and Landfills.
- Materials must be contained, **double-bagged and sealed** in plastic bags that are at least 6 mil thick (0.006 inches) before arriving at a CSRD Landfill or Transfer Station.
- Other acceptable methods of containment include Bin Liners (Waste Disposal Bins) and sealed 6 mil polyethylene sheeting (Poly).
- Material must be deposited in the appropriate location for disposal as directed.

NOTES

PRE-1990 Renovation/Demolition Waste is considered to be **Asbestos-Free Waste Material** only if it is accompanied by the *Asbestos Declaration and Acknowledgement Form* that includes a Hazard Assessment from a qualified professional. Asbestos-Free Waste Materials are accepted as regular refuse under Category 1.

The *Asbestos Declaration and Acknowledgement Form* is available on the CSRD website www.csr.bc.ca and at all CSRD Landfills and Transfer Stations.

Category 3

PRE- 1990 Renovation/Demolition Waste - Unbagged/Uncontained Waste

DEFINITION

PRE-1990 (before 1990) Renovation/Demolition Waste consists of **Materials that May Contain Asbestos** installed before December 31, 1989 **OR** where the origin, age and content of the renovation/demolition materials are unknown.

PRE-1990 Renovation/Demolition Waste materials are deemed to be **Waste Material That May Contain Asbestos** and must be handled, disposed of and charged accordingly.

DISPOSAL INSTRUCTIONS

- PRE-1990 Renovation/Demolition Waste that is in a loose load (unbagged/uncontained) is accepted for disposal at all CSR LANDFILLS ONLY.
- Loose loads (unbagged/uncontained) material will require immediate burial at the active face. Customers will have wait for landfill staff to prepare for safe disposal.
- Disposal Information and CSR Contact is given to customer.
- Licence plates/accounts will be forwarded to the CSR so proper handling procedures can be reviewed. These customers will be flagged and unbagged/uncontained loads (Category 3) will be turned away in the future.

NOTES

PRE-1990 Renovation/Demolition Waste is considered to be **Asbestos-Free Waste Material** only if it is accompanied by the *Asbestos Declaration and Acknowledgement Form* that includes a Hazard Assessment from a qualified professional. Asbestos-Free Waste Materials are accepted as regular refuse under Category 1.

The *Asbestos Declaration and Acknowledgement Form* is available on the CSR website www.csr.bc.ca and at all CSR Landfills and Transfer Stations.
